In all of the tables in this document, both the pre-2009 NQF Level and the NQF Level is shown. In the text (purpose statements, qualification rules, etc), any references to NQF Levels are to the pre-2009 levels unless specifically stated otherwise.

This unit standard does not replace any other unit standard and is not replaced by any other unit standard.

PURPOSE OF THE UNIT STANDARD

This Unit Standard is designed to provide credits towards the mathematical literacy requirement of the NQF at Level 2. The essential purposes of the mathematical literacy requirement are that, as the learner progress with confidence through the levels, the learner will grow in:

- . A confident, insightful use of mathematics in the management of the needs of everyday living to become a self-managing person
- . An understanding of mathematical applications that provides insight into the learner`s present and future occupational experiences and so develop into a contributing worker

The ability to voice a critical sensitivity to the role of mathematics in a democratic society and so become a participating citizen

People credited with this Unit Standard are able to:

Apply various techniques to organise and represent data in order to model situations for specific purposes.

Give opinions on the implications of the modelled data for the required purpose.

LEARNING ASSUMED TO BE IN PLACE AND RECOGNITION OF PRIOR LEARNING

The credit value is based on the assumption that people starting to learn towards this unit standard are competent in Mathematics and Communications at NQF level 1.

UNIT STANDARD RANGE

This unit standard includes the requirement to:
Identify issues suited to resolution by basic statistical methods.
Work with existing data.
Generate statistics through the use of calculators and other available technology.
Represent data in the form of tables, charts and graphs.
Use statistics and representations of data to
Summarise real-life and or work related issues within the experience of the learner.
Give opinions on statistics and representations of data.
More detailed range statements are provided for specific outcomes and assessment criteria as needed.

Specific Outcomes and Assessment Criteria:

SPECIFIC OUTCOME 1

Apply various techniques to organise and represent data in order to model situations.

OUTCOME NOTES

Apply various techniques to organise and represent data in order to model situations for specific purposes.

OUTCOME RANGE

Techniques include:

Using a variety of methods to represent statistics including pie charts, bar graphs, stem and leaf plots;

Reading tables (e. g., the meaning of row and column headings and the relationship between age by gender by province);

Extracting a suitable set of data from tables and databases (e. g., census data, tables in newspapers, HIV data; weather data);

Recording and organising data into tables;

Calculating measures of centre and spread such as mean, median, mode, and range; the use of Quartiles in classifying data items ("Measures of centre and spread" should be handled via examples, which are directly related to the life or work experiences of each learner. For example workers' wages and learners' test scores).

ASSESSMENT CRITERIA

ASSESSMENT CRITERION 1

1. Questions about sets of data that can be dealt with through statistical methods are identified correctly.

ASSESSMENT CRITERION 2

2. Existing tables are understood correctly through a proper application of row and column headings.

ASSESSMENT CRITERION 3

3. Raw data or statistics in the body of tables are used correctly.

ASSESSMENT CRITERION 4

4. Effective methods to record and organise data are used to solve problems.

ASSESSMENT CRITERION 5

5. Calculations of statistics are correct.

ASSESSMENT CRITERION 6

6. Appropriate statistics are used to answer questions.

ASSESSMENT CRITERION 7

7. Scales used in graphical representations and tables are consistent with the data, are correct, clear and appropriate to the situation and target audience.

SPECIFIC OUTCOME 2

Give opinions on the implications of the modelled data for the required purpose.

OUTCOME RANGE

Purposes include:

Determining trends in societal issues such as crime and health;

Identifying relevant characteristics of target groups such as age range, gender, socio-economic group, cultural belief, and performance;

Considering the attitudes or opinions of people on current issues relevant to the life experience of the learners;

Determining weather patterns for a given region.

ASSESSMENT CRITERIA

ASSESSMENT CRITERION 1

1. Verbal (written or oral) explanation of findings is based on the representation of the data.

ASSESSMENT CRITERION 2

2. Trends, group profiles and attitudes are justified.

ASSESSMENT CRITERION 3

3. Appropriate information is extracted from representations in order to answer questions.

UNIT STANDARD ACCREDITATION AND MODERATION OPTIONS

Providers of learning towards this unit standard will need to meet the accreditation requirements of the GENFETQA.

Moderation Option:

The moderation requirements of the GENFETQA must be met in order to award credit to learners for this unit standard.

UNIT STANDARD ESSENTIAL EMBEDDED KNOWLEDGE

The following essential embedded knowledge will be assessed through assessment of the specific outcomes in terms of the stipulated assessment criteria. Candidates are unlikely to achieve all the specific outcomes, to the standards described in the assessment criteria, without knowledge of the listed embedded knowledge. This means that the possession or lack of the knowledge can be inferred directly from the quality of the candidate's performance against the standards.

Methods for selecting, organising data and calculating statistics

The meaning of concepts such as centre and spread

Techniques for representing and drawing conclusions from statistics.

Critical Cross-field Outcomes (CCFO):

UNIT STANDARD CCFO IDENTIFYING

Identify and solve problems using critical and creative thinking:

Give opinions, based on data and statistics, on a variety of problems and issues.

UNIT STANDARD CCFO COLLECTING

Collect, analyse, organise and critically evaluate information:

Select, organise, and give opinions on statistics to make sense of situations related to the life or work of the learner.

UNIT STANDARD CCFO COMMUNICATING

Communicate effectively:

Use everyday language and mathematical language to represent data, statistics and probabilities and to communicate conclusions.

UNIT STANDARD CCFO CONTRIBUTING

Use mathematics:

Use mathematics to describe and represent situations and to solve life related problems.

UNIT STANDARD ASSESSOR CRITERIA

Assessors should keep the following general principles in mind when designing and conducting assessments against this unit standard:

Focus the assessment activities on gathering evidence in terms of the main outcome expressed in the title to ensure assessment is integrated rather than fragmented. Remember we want to declare the person competent in terms of the title. Where assessment at title level is unmanageable, then focus assessment around each specific outcome, or groups of specific outcomes.

Make sure evidence is gathered across the entire range, wherever it applies. Assessment activities should be as close to the real performance as possible, and where simulations or role-plays are used, there should be supporting evidence to show the candidate is able to perform in the real situation.

Do not focus the assessment activities on each assessment criterion. Rather make sure the assessment activities focus on outcomes and are sufficient to enable evidence to be gathered around all the assessment criteria.

The assessment criteria provide the specifications against which assessment judgements should be made. In most cases, knowledge can be inferred from the quality of the performances, but in other cases, knowledge and understanding will have to be tested through questioning techniques. Where this is required, there will be assessment criteria to specify the standard required.

The task of the assessor is to gather sufficient evidence, of the prescribed type and quality, as specified in this unit standard, that the candidate can achieve the outcomes again and again and again. This means assessors will have to judge how many repeat performances are required before they believe the performance is reproducible.

All assessments should be conducted in line with the following well-documented principles of assessment: appropriateness, fairness, manageability, and integration into work or learning, validity, direct, authentic, sufficient, systematic, open and consistent.

REREGISTRATION HISTORY

As per the SAQA Board decision/s at that time, this unit standard was Reregistered in 2012; 2015.

UNIT STANDARD NOTES

PROVIDERS CURRENTLY ACCREDITED TO OFFER THIS UNIT STANDARD:

This information shows the current accreditations (i.e. those not past their accreditation end dates), and is the most complete record available to SAQA as of today. Some Primary or Delegated Quality Assurance Functionaries have a lag in their recording systems for provider accreditation, in turn leading to a lag in notifying SAQA of all the providers that they have accredited to offer qualifications and unit standards, as well as any extensions to accreditation end dates. The relevant Primary or Delegated Quality Assurance Functionary should be notified if a record appears to be missing from here.
